

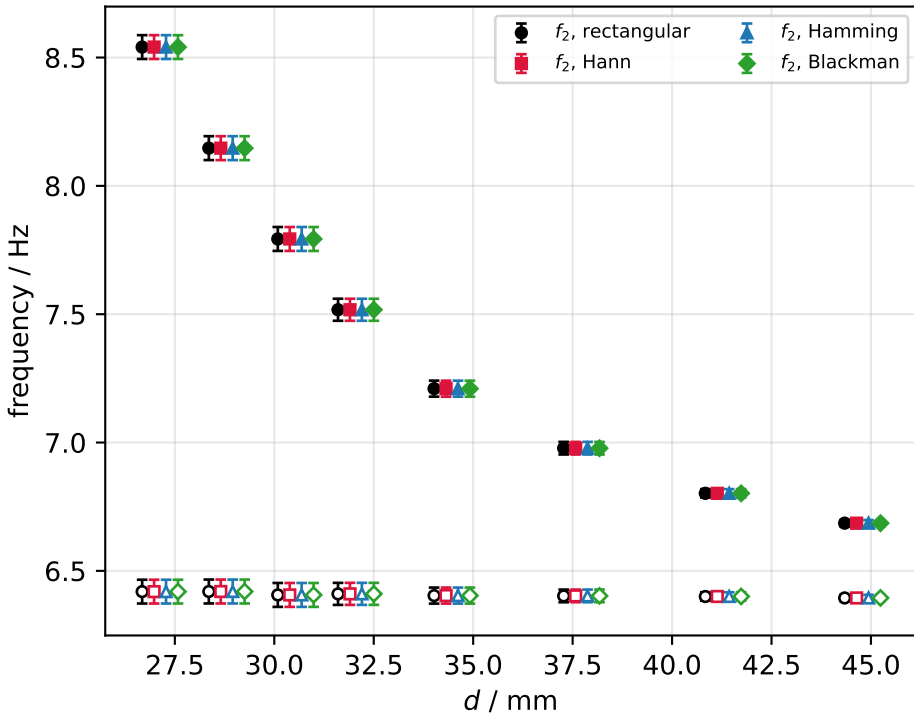

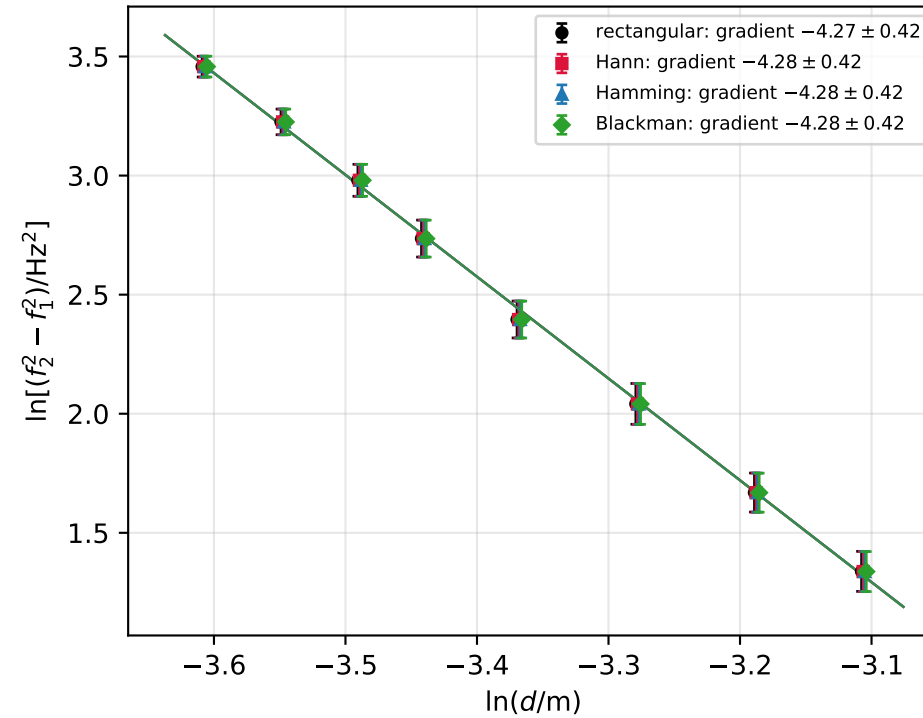

Graph 6: effect of the FFT window. Top: normal-coordinate method (one peak per spectrum). Bottom: conventional two-peak FFT of mass A alone.

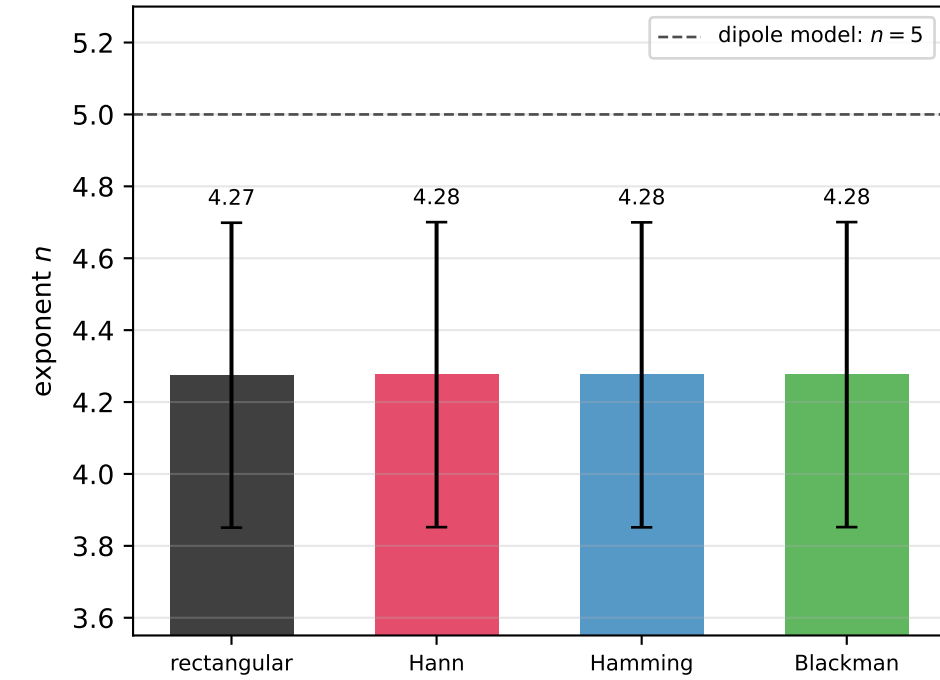

(a) f_1 (open) and f_2 (filled), normal coordinates

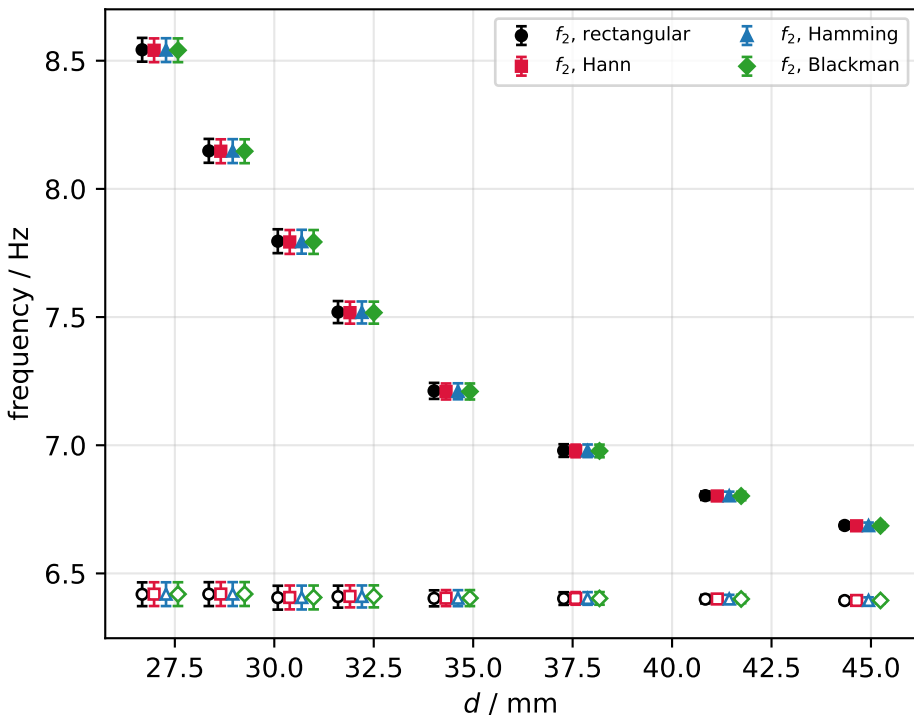

(b) ln-ln fit with each window

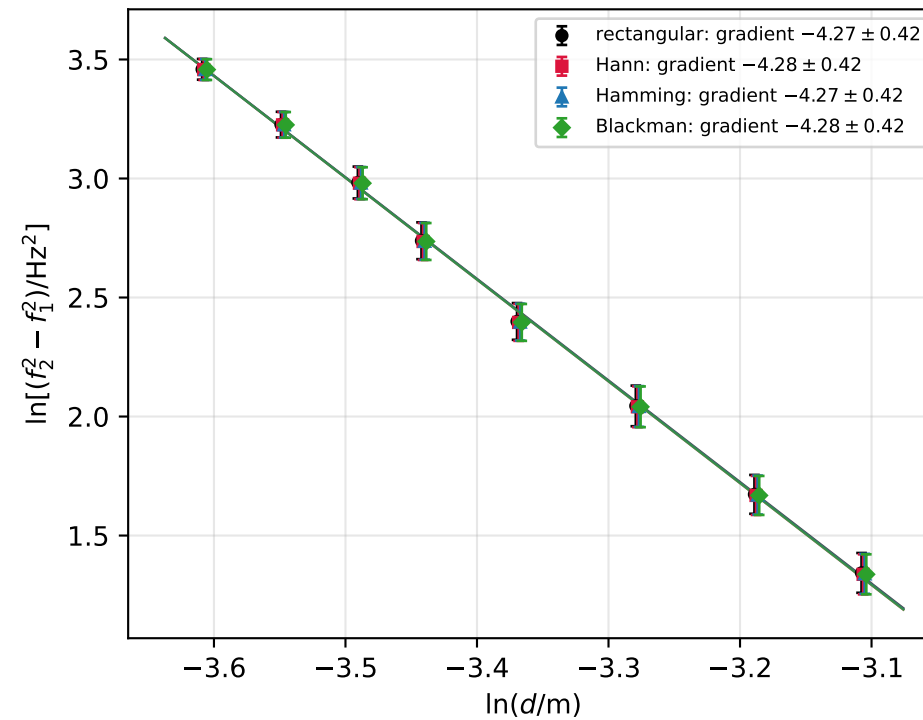

(c) exponent from each window (error bar: max/min gradient)

(d) f_1 (open) and f_2 (filled), conventional

(e) ln-ln fit with each window

(f) exponent from each window (error bar: max/min gradient)
